

Transforming Technology Into Solutions

Enterprise resource planning (ERP) solutions integrate key business and management processes, providing a high-level view to an organization's business. ERP integrates fragmented business operations, often replacing multiplicity of legacy systems in the process. Our expertise extends to all modules and versions of SAP, Siebel, PeopleSoft and JD Edwards.

Our ERP services encompass:

- Gap Analysis and Business Process Re-engineering
- Implementation
- Post-implementation support
- Application value management
- Functional and technical consulting
- Version upgrades
- Integration with legacy applications
- Business Intelligence

Technical Ability :

- SAP
- Siebel
- PeopleSoft
- Oracle
- JD Edwards
