

Softek
International

Transforming Technology Into Solution

Softek International has a well-defined and mature application development process which comprises the complete SDLC from business case analysis to warranty support of application.

This process supports a distributed delivery environment wherein work responsibilities can be effectively divided between the delivery teams spread across the globe. Each of the development phases can be defined with metrics and subsequently tracked with the web based tools which can be used by our customers.

The application development methodology can used for:

- New application development
- Existing application enhancement
- Application consolidation
- Application migration

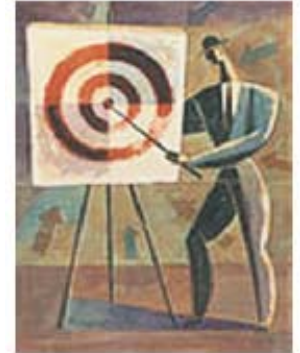

Application Development – Delivering Peace of Mind Service

CSL and QPR measures :

- Application development & enhancement (M&E) productivity
- Schedule compliance
- Application scope management
- Budget adherence
- Project status
- Delivered product quality
- Post Implementation customer satisfaction
- Phased containment
