

Offshore Solutions: "Savings, Productivity & On Time Delivery"

Softek
International

Transforming Technology Into Solutions

"On average companies' report 40% to 60% in net savings with the help of Offshore IT Outsourcing"

We believe outsourcing must deliver measurable benefits: cost savings, productivity increases and on time delivery. Softek has partnered with a technology leader in India to leverage out sourcing capabilities. With our partners in India and our technology team in USA, we successfully provide consultancy and programming services to our clients as an Offshore Software Development Center.

Using our offshore outfit in India, our client can benefit from the following:

Cost savings of up to 50% can be realized by leveraging low cost offshore development centers. Operational efficiency can dramatically improve top line growth and bottom line savings.

Faster time-to-market:

By integrating onshore and offshore teams, service suppliers are able to work on a 24/7 basis, spanning time zones to shorten development and testing schedules and deliver rapid cost-effective results.

Focus on core activities:

Outsourcing non-core functions, either locally or offshore, frees internal resources to focus on business-critical initiatives and reduce dependency on third party contractors.

Access critical technology skills: Offshore outsourcing has opened up a global technology talent pool, providing enterprises with affordable access to critical IT skills.

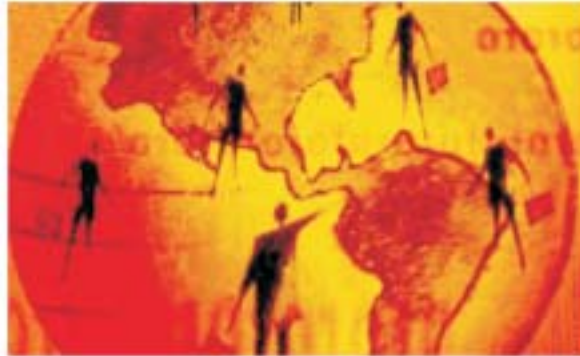

Offshore Solutions: "Savings, Productivity & On Time Delivery"

Improved quality:

Led by Indian suppliers, offshore outsourcers as a group have embraced third-party quality standards and software life cycle processes that, in some cases, are more rigorous than those of their customers.

Our offshore delivery model sets the processes and procedures in place, assuring our clients with the highest standards of quality. Utilizing our offshore software services, you can benefit in the following ways:

- 24/7-hour development capacity on the basis of a virtual 12-hour time zone difference with USA and other major markets for IT enabled services.
- Our offshore software development team comprises of professionals who are experts in their skills and at the same time quality conscious too.
- We offer solutions at competitive prices allowing you to leverage your existing IT resources.

Key Benefits:

- Cost efficiency
- Availability of trained IT staff
- Flexible manpower utilization
- No up-front investment

The outsourcing is not just a strategy of cost reduction. It is in fact, a strategic service & essential element of growth

Outsourcing is no longer a question of "IF" but "WHEN"
